

For parents of children with ADHD

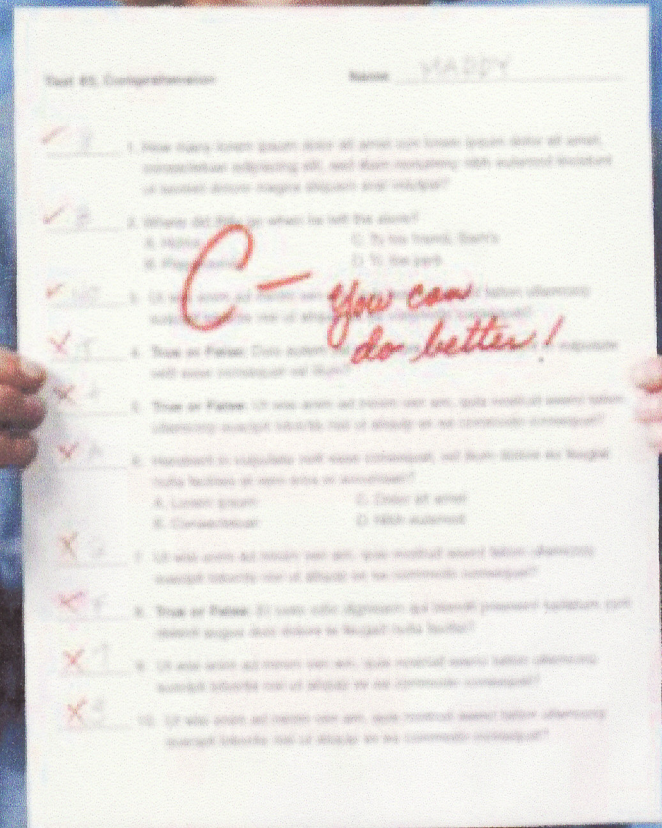

# Apply where it hurts... from not meeting expectations.

Her intelligence shining through in her schoolwork. A beaming face, ready to go to school. Raising her hand—to show what she's learned. You'd like to give your child the opportunity to enjoy the same achievements as children *without* ADHD.

## Apply Daytrana®, the first and only patch for ADHD.

- Peel and press to provide all-day ADHD symptom control.
- No pills to fight over...or to remind her she's "different." Just a small, clear patch.
- Once Daytrana goes on, it stays on—through playground fun, sweat, showers and even swimming.
- You control the dosing, because you choose when to take it off.

Ask your doctor whether Daytrana, the first and only patch for ADHD, is a better fit for your child.
